Experience

Developer at systory company

2023 - 2025

- Design custom documents, such as flowcharts, sequence diagrams, etc. Most of the work is done in Japan, and the application is customizable. Plugins work in the Kintone app.
- Write code, review code, and create documents related to unit and integration testing.
- Connect with ChatGPT to help analyze problems and provide solutions.
- Connect with Google Translate for translation from English to Japanese.
- Sendgrid for emails, with customizable content.
- Collaborate on various projects with Systory partner companies.
